- Suitable for students working below grade level, on grade level, and above
- Aligned to national standards, with state coverage reports available
- Provides a rigorous packaged summer school curriculum
- Targets learning with exemptive unit pretests
- Includes teacher support materials and professional development

Measurable Success

Credit recovery and first-time course credit

PLATO® Courses can be used by at-risk students to recover course credit, or by on-grade and above-grade students to accelerate the rate in which they earn course credit.

- Online whole-semester courses compressed for summer schedule
- Award-winning dynamic digital media
- Middle and high school content in the four core subjects
- Designed using Fordham Foundation best practices

Students love PLATO® Courses!

- Interactive content grabs their attention—not page after page of boring text
- Self-paced—students focus only on filling knowledge gaps
- A fun, engaging, and rich learning environment where students can achieve success

Teachers love PLATO Courses!

- Rigorous curriculum tied to state standards
- Streamlined professional services training to ensure program success
- Support materials make implementation a snap
- Assessments and reporting track student progress and performance

“Through this program [course recovery with PLATO], we believe we can enable these at-risk students to graduate on time and earn a regular high school diploma, improve the district’s graduation rate, reduce the cohort dropout rate, and increase the use of our schools for after-school programming.”

—Carol Johnson, superintendent, Memphis City Schools

Meeting middle and high school needs

PLATO® Algebra 1A

Students practice applying math concepts with guidance from online mentors.

PLATO® Biology A
Abstract science concepts come to life through interactive tutorials.

Teacher support materials

Each PLATO Course includes support materials for easy, flexible integration.

- Recommended course compressions and assessment mappings
- Answer keys—available for offline activities and end-of-course tests
- Professional Services—ensure a quick and easy implementation
- Reports—track student learning

Assessments

Exemptive assessments are used for placement within a course. Module assessments track student progress throughout a course. Cumulative assessments are used for end-of-course evaluation.

Provide educational options for your students. Find out how PLATO® Stress-Free Summer School can meet your credit recovery and first-time credit summer school goals. Call 800.44.PLATO or visit www.plato.com/stress-free-summer-school.aspx
