

Maryville City School System Maryville, Tennessee

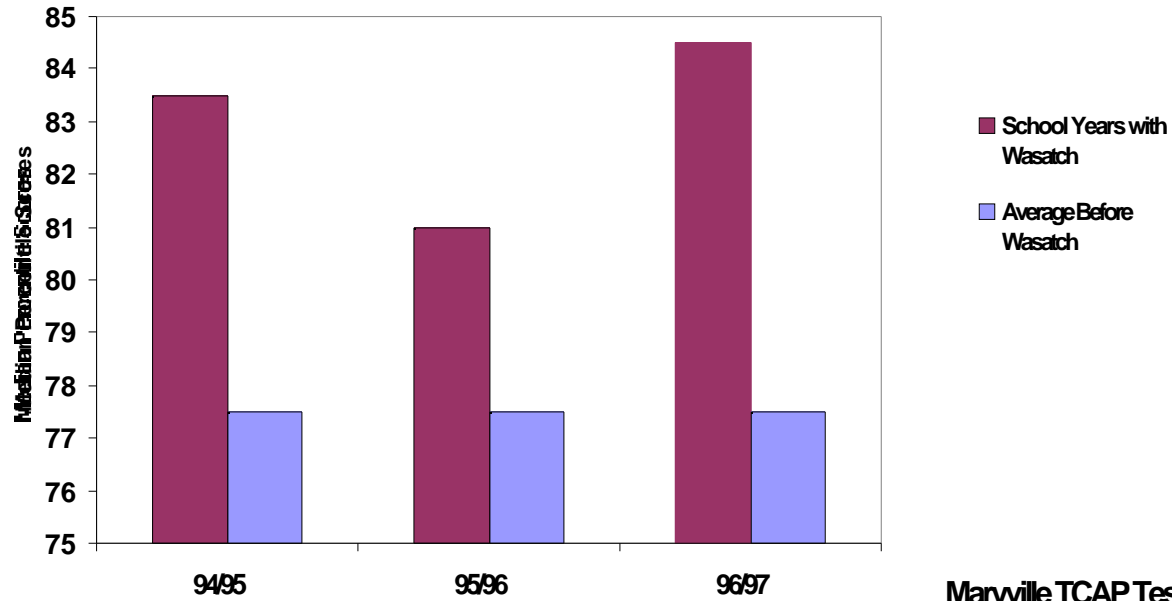

Maryville City Schools purchased a district-wide license three years ago for all elementary schools. We've been told by the district personnel involved with the implementation and subsequent use of the courseware that they are extremely pleased with the quality of the courseware as well as the training and service provided. Maryville elementary teachers are using the courseware to augment their instruction at all grade levels.

Maryville provided the following raw test score data from the TCAP (Tennessee Comprehension Assessment Program). Maryville City Schools placed in the top ten school districts in the state on the statewide test. It was a compliment to us when Wasatch was selected three years ago, over many competing companies, as Maryville's partner in enhancing their student learning.

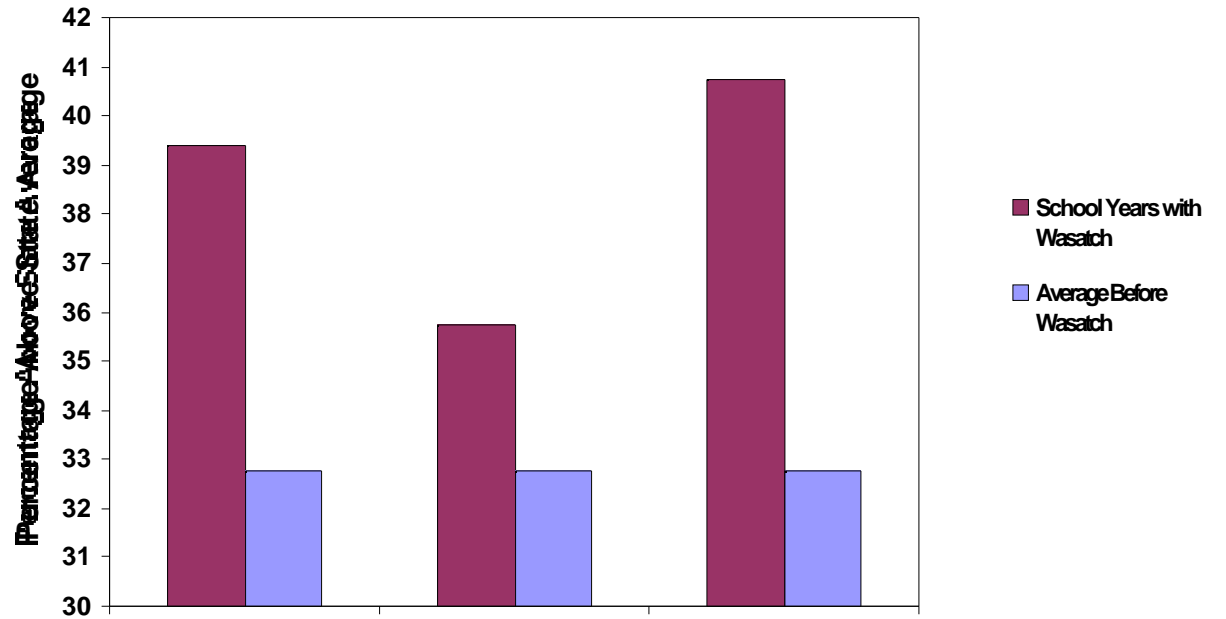

In the three years that Wasatch courseware has been in use in the Maryville City Schools the Maryville average Median Percentile Scores for grades 2 through 6 have increased over the previous years, before Wasatch was used. In addition, the percentage that Maryville exceeds the state average increased significantly in the Wasatch years over the average of the prior three years. The district personnel are emphatic there has been a positive influence from the use of the courseware and test scores support their claim.
